

**For immediate release  
22 July 2009**

**Group NBT plc**

**Trading update**

Group NBT plc is pleased to announce that, in spite of challenging markets, the Company has continued to trade well throughout the second half of the financial year and the Board expects that results for the year to 30 June 2009 are likely to be slightly ahead of market forecasts.

The Company's underlying business model of recurring revenue from corporate customers has proved to be resilient and we have had good performance especially in domain name management and in our reseller business.

Preliminary results for the full year will be announced on 24 September 2009.
